

Anthony Purvis, Former DISA Data Center Leader, Joins Suss Consulting

JENKINTOWN, Pa., March 10, 2025 – Suss Consulting, a leading provider of federal IT opportunity capture, proposal support, price-to-win analysis, strategic planning, and market research services, today announced the addition of Anthony Purvis, who recently served as the Chief of Compute Operations at the Defense Information Systems Agency (DISA), where he led the agency’s data center mission, supporting over 1.5 million users across 11 global locations.

“Tony’s experience and insight into all aspects of DoD data center operations and management will help our clients develop winning solutions to modernize the Department’s information infrastructure,” said Warren Suss, President of Suss Consulting.

Throughout his distinguished 33-year career in government service, Mr. Purvis held key leadership roles. As Chief of Compute Operations, he oversaw nine Lines of Business (Mainframe, Server, Infrastructure, Datacenter, Implementation and Sustainment, Special Services, Cyber Services, Communications, and Command & Control). He was responsible for deploying capacity, monitoring utilization, administering operating environments, refreshing technology, and decommissioning capacity for all DoD mission partners. Mr. Purvis consistently sought opportunities to drive operational efficiency, reduce costs, and provide exceptional support to the warfighter.

In his previous role as Director of the Defense Enterprise Computing Center (DECC) Oklahoma City, Mr. Purvis managed one of DISA’s four major computing centers, overseeing critical DoD enterprise services, including DoD Enterprise Email (DEE) and DoD Mobility Unclassified Capability (DMUC).

Earlier in his career, Mr. Purvis served as the Chief of the Business Services Management Center for the DISA Computing Services Directorate, where he managed an \$800M annual budget across 16 production sites and two test/development sites. Under his leadership, several high-profile projects gained agency-wide recognition, including a series of innovative capacity services contracts valued at \$700M over eight years. These contracts were groundbreaking in the government sector, offering flexible and scalable support to Computing Services customers while reducing operational costs. Mr. Purvis earned accolades from both technical publications and multiple levels within the DoD for his achievements.
