Bruce Paton, DLA CTO, Joins Suss Consulting

JENKINTOWN, Pa., September 1, 2021 – Suss Consulting, a leading provider of federal IT opportunity capture, proposal support, strategic planning, and market research services for the federal IT industry, today announced the appointment of Bruce Paton as a lead consultant. Mr. Paton’s 28-year career as an IT executive at the Defense Logistics Agency (DLA) culminated with his service for five years as the DLA Chief Technology Officer (CTO).

“Bruce’s deep understanding of DLA’s modernization goals and challenges will help our clients meet the government’s need for more effective, efficient and secure end-to-end global defense supply chain solutions,” said company president Warren Suss.

As DLA’s CTO, Mr. Bruce Paton was responsible for the \$40 Billion agency’s technology strategies, including enterprise product standards and approvals, enterprise architecture, and strategic vendor relationship management.

He provided the foundation for DLA’s end-user collaboration modernization and led the strategy for a Modern Desktop utilizing VDI, thin clients, smartphones, tablets, Office365, and video collaboration tools to provide logisticians supporting the warfighter with access to DLA systems from anywhere on any device.

Mr. Paton also led efforts to standardize the hardware and software product portfolios across the Agency and was responsible for the development and implementation of a single, disciplined approach for analysis and approval of Agency-wide IT requirements. He created a strategic IT vendor relations capability within the CTO office. He also developed a DLA Data Strategy to integrate the diverse data sources across the agency into a data warehouse that can provide data analysts with access to all the data they need, data space to work in, and cutting-edge analysis and visualization tools.

About Suss Consulting Inc.

Suss Consulting provides support services to both industry contractors and the federal government. The firm has helped contractors win more than \$23 billion in government contracts through its strategic planning, market research, bid and proposal and business capture services. Suss Consulting also works directly with federal agencies and their prime contractors to improve IT management, minimize costs, comply with White House oversight directives and achieve other management and budgetary objectives.
